Premiere Pro CC18 Project: Dynamic Intro Opener

Don`t required After Effects, only Premiere Pro
36 photo/video placeholders
30 Text placeholders
10 color presets
Duration 0:15
Full HD 1080p, 25 fps
No Plug Ins required
No Photo/Video/Music included

Introducing to project.

Final Edit – is main sequence that you have to render.
In **Edit Placeholders** folder you can find subfolders with sequences that you can adjust.
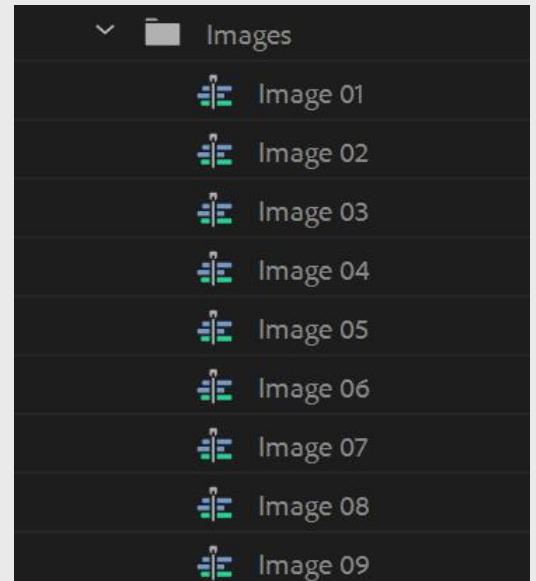

There are all text layers in **Text** subfolder, just use **Graphics** workspace to change and adjust text.

In **Colors** subfolder you can see color matte layers in which you can change color of BG text grid.

Just import your photos in Project Manager (drag it here, or – right click-import), open needed sequence in **[Images]** folder and drag it here. Place your footage in appropriate sequences (Image 1,2,3...). In this sequences you can scale your Footage and change it position like you want.

In project used fonts

Morganite - https://www.behance.net/gallery/66748265/Morganite-Free-Typeface-18-Styles
